

Revolutionary Medical Device Designed to Help Give “Ouchless” Injections

VIBRATION ANESTHESIA DEVICE

is a non-toxic, non-carcinogenic medical injection device which is universally acclaimed for its effectiveness. From heel injections, to vaccinations and dermal fillers, thousands of medical professionals around the globe are seeing the benefits of administering “Ouchless” injections.

PRODUCT BENEFITS

- Specifically designed to help eliminate carcinogenic and hazardous cold sprays from your office
- Utilizes the “Gate Control Theory of Pain” so that the injection process can be Comfortably Numb™ for patients
- Anesthetic effects are felt instantly by the patient
- Helps minimize the potential for patient’s rescheduling their appointments, and helps increase “word of mouth” patient-referrals for practices
