

### Proprietary Two-Step Wart Treatment System

# VERUCIDE<sup>®</sup>

## WART REMOVER

is a proprietary two-step wart removing kit formulated with Salicyclic Acid (17%) and the proven penetrating benefits of Papaya Extract (Papain). Patients typically achieve desired results in as little as 27 days.

### PRODUCT BENEFITS

- Utilizes Salicyclic Acid (17%), and penetration-enhancing Papaya Extract (Papain) as the product vehicle
- Specifically developed for the management and removal of common (Verruca vulgaris) and plantar (Verruca plantaris) warts
- Once applied, solution creates a medicated layer to provide continued treatment

Unique two-step process

Before

After

Fungal Care • Skin Care  
Wound Care • Pain Management
