

DISPENSED BY YOUR PHYSICIAN

VERUCIDE[®]

WART REMOVER

Patient Instructions*

1. Clean the wart with one or two drops of the Pre-Treatment Solution using your fingertip or cotton swab
2. Rinse the wart with water and dry thoroughly
3. Dab a small amount of Wart Removal Solution directly onto the wart
4. Allow the Wart Removal Solution to dry for approximately 1 minute
5. Repeat the steps above once-daily until the wart falls off

*Complete Instructions on Product Label

FAQs:

- Q: How long does it normally take before the wart falls off?
A: Results vary as each person's body responds differently; however, the wart will typically fall off after 28 days.
- Q: Why is the Pre-Treatment Solution needed?
A: The Pre-Treatment Solution helps clean the wart surface, which ensures the Wart Removal Solution is applied directly onto the wart.
